

# REVERSE OSMOSIS

**Bulk R.O/Demineralized  
water delivered on time!**

Rebel Heart can deliver tens of thousands of litres per day!

## What is Reverse Osmosis (R.O)/Demin water

**REVERSE OSMOSIS** is a water purification process that removes unwanted molecules, chemicals, bacteria, minerals, and other impurities.

# SAY GOODBYE TO HARD WATER

**We now produce & deliver bulk R.O/Demin water for industrial & commercial applications**

**EACH YEAR**, industrial, commercial, and agricultural industries lose millions due to preventable shutdowns. Hard water leaves mineral deposits, which can damage key systems, necessitating repairs and sometimes replacement of essential machinery and equipment.

The need for highly purified water is ever-increasing, with many applications in the commercial, industrial, agricultural, and oil & gas sectors. Whether you require R.O/Demin water for hydro-testing, chemical/industrial cleaning, boiler feed, or farming, **Rebel Heart has you covered!**

**Our Reverse Osmosis process removes the following impurities:**

- ✓ Bacteria
- ✓ Chemicals
- ✓ Metals
- ✓ Minerals
- ✓ Parasites
- ✓ Sediment

## WHO USES R.O

INDUSTRIAL

COMMERCIAL

OIL & GAS

AGRICULTURAL

POWER GENERATION

# WHO IS REBEL HEART
